In a small group, select the idea you like most. You need to develop this idea and then present it to the rest of the class. There will then be a vote to decide which idea is the best
In the presentation, you will need to say the following:
What your idea is
Why you have chosen this idea
 How you will implement your idea (include details such as when, where, who will be involved and what equipment (if any) is necessary)
What you hope to achieve
Any problems which may arise and what you will do about them
Why you think your idea is better than alternative ideas
